Eugene CHIANG has sent you a bSpace Message from Astro 7A Sections:

---

***Forwarded Message***

**Authored By** CHIANG, Eugene ( Sep 18, 2012 3:34 PM )  
**To** All Participants; Instructor Role; GSI Role; Head GSI Role  
**Subject** Treehuggers  
**Label** Normal

Hello 7A,

My number one suggestion to you for the tree problem is to **\*\*go outside, find a tree, sit under it, and look up.\*\***  
As you are looking up, think about the "column" and the "column density" that we introduced in lecture.

Enjoy,

Eugene

PS You can also do it the hard way. If you come to my office hours tomorrow Wed 2-3 pm (HFA Building B26), be warned that I will not be up to speed on the differences between the Ponderosa Pine and the Douglas Fir.
